Summary

My fad in studying Computer Science Engineering is engendered by the belief that machine learning and programming are the mere tools to solve the real world grave complications (e.g. developing an image detector that help detect suspicious faces).

I am avidly interested in nurturing my existing know-how of python that I have gained online from world's profound Professors namely; Scott Rixner and Joe Warren from Rice University. since, I have done a specialization in Machine Learning offered online by the University of Washington, therefore I am interested to further boost the gained knowledge. I am fortunate to have done Deep Learning Specialization from Prof. Andrew Ng, an adjunct professor at Stanford University. in addition to my academic endeavors, I am fond of reading spiritual books and fiction novels.

Experience

TheSmartBridge

Artificial Intelligence Intern

April 2020 - May 2020 (2 months)

Glad to complete internship program offered by Smart Bridge, i had the role of artificial intelligence intern. From studying alone from online courses for the past few months, it was great to have some company to work with.

Education

Punjab Technical University

Bachelor of Technology - BTech, Computer Science · (2018 - 2022)
